"We acknowledge the Centers for Disease Control and Prevention for its support of the Wyoming Cancer Surveillance Program and the printing and distribution of the WCSP newsletter under cooperative agreement #1U58DP003896-03 awarded to the Wyoming Cancer Surveillance Program. The findings and conclusions in this report are those of the author(s) and do not necessarily represent the official position of the Centers for Disease Control and Prevention."

### Registry News:

- WCSP has recently received the "Gold Standard" for our 2011 data from the North American Association of Central Cancer Registries. The gold standard means the registry has achieved the highest NAACCR standard for complete, accurate, and timely data.
- The registry has also received the 2013 Registry Excellence Award from the National Program of Cancer Registries. This award is for meeting advanced national data quality for cancer cases diagnosed in 2012.

## Meaningful Use:

WCSP is in the initial stages of implementing Meaningful Use II and hope to have it in use by July 2015.

Meaningful use Stage II is intended to increase health information exchange between providers and aims to ensure that cancer cases in Wyoming are more easily identified and reported.
